PROFESSIONAL SUMMARY

Supply chain professional with 3+ years of end-to-end experience spanning procurement, demand planning, inventory management, logistics coordination, and supplier relationship management across technology and manufacturing environments. Proven track record optimizing material flow, reducing costs, and driving cross-functional S&OP execution using SAP, Oracle ERP, and advanced analytics tools. Skilled at translating data into actionable insights.

EDUCATION

Master of Science in Supply Chain Management | University of Maryland, Robert H. Smith School of Business | GPA 3.75 College Park, MD
• Terrapin Scholar | Lean Six Sigma Green Belt | 1st Place – Orientation Case Competition (E-livestock Global) December 2025

Bachelor in Accounting & Finance | University of Mumbai, K.J Somaiya College of Science & Commerce | GPA 3.78 Mumbai, India
• Relevant Coursework: Logistics & Transportation, Operations Management, Business Mathematics, Cost Accounting April 2022

SKILLS

Technical: SAP S/4HANA, SAP Ariba, Oracle ERP, Tableau, Power BI, Zoho Analytics, SQL, RStudio, Excel (Advanced), Python (Beginner)

Supply Chain & Analytical: Supply Chain Data Analysis, Inventory Management & Replenishment, Demand Forecasting, Supply Planning, MRP (Material Requirements Planning), S&OP (Sales & Operations Planning), Inventory Optimization, Logistics & Transportation Optimization, Procurement & Strategic Sourcing, Supplier Relationship Management, Cost Reduction & Process Improvement, KPI Reporting & Data Visualization

Soft/Business: Cross-Functional Collaboration, Supply Chain Strategy Execution, Contract Management, Process Improvement, Project Management

WORK EXPERIENCE

ANGARAI International Inc. College Park, Maryland
Supply Chain Planner and Procurement Analyst (Supply Chain, HR & Finance Processes) June 2025 – Present

- Managed end-to-end supply chain operations across procurement, inventory planning, and supplier coordination to ensure material flow.
- Monitored supplier KPIs including lead times and delivery reliability, mitigating supply risks and driving 22% on-time performance gain.
- Analyzed inventory levels and demand trends in Zoho Analytics, improving forecast accuracy 38% and reducing excess and obsolete stock.
- Standardized SAP contract and invoice workflows cutting manual effort 28%, improving supply chain process efficiency and reporting 35%.
- Led cross-functional S&OP communications across planning, finance, and logistics, aligning supply commitments to all business needs.

Panda Restaurant Group College Park, Maryland
Inventory and Supply Planning Associate Sept 2024 – Sept 2025

- Executed demand forecasting and inventory replenishment planning, maintaining optimal stock levels and days-of-supply targets across all SKUs.
- Applied FIFO and reorder point strategies to reduce material waste 22%, improving inventory health and supply chain planning efficiency overall.
- Maintained 98% inventory accuracy through standardized tracking systems, ensuring data integrity across supply chain reporting and operations.
- Coordinated with suppliers and logistics partners to resolve inbound discrepancies, improving material flow and delivery reliability by 15%.
- Streamlined replenishment workflows and reorder planning, boosting working capital efficiency 18% while reducing overstock and supply risk.

TATA Consultancy Services | Project: The Boeing Company Mumbai, India
Supply Chain & Sourcing Analyst Sept 2023 – July 2024

- Supported end-to-end supply chain execution for Boeing programs spanning sourcing, procurement, logistics coordination, and supplier management.
- Led supplier negotiations and contract lifecycle management, reducing procurement bottlenecks 21% and improving supply continuity across operations.
- Processed 12,000+ purchase orders annually at 99.8% accuracy via SAP Ariba and Oracle ERP, maintaining data integrity across supply functions.
- Partnered cross-functionally to resolve supply backlogs and material shortages, reducing open supply gaps 35% and improving on-time delivery.
- Conducted supplier risk and capacity analyses, enabling proactive supply chain mitigation across program transitions and engineering changes.

CampusConnect Technologies Pvt. Ltd. | Project: LogIQids Mumbai, India
Product and Operations Analyst (Operation & Logistics) June 2022 – June 2023

- Managed full supply chain cycle from procurement and supplier coordination to logistics and last-mile delivery across 100+ school deployments.
- Negotiated supplier contracts securing 16% cost reductions; implemented scorecards improving supplier visibility and performance accountability 27%.
- Optimized production scheduling and inbound logistics, improving cycle time 25% and reducing shortages during high-demand seasonal ramp periods.
- Analyzed 5-year demand trends across 250 SKUs in 6 countries, improving monthly service levels 7% through data-driven inventory replenishment.
- Identified supply chain process gaps and standardized reorder workflows, improving end-to-end procurement and logistics cycle efficiency by 21%.

Uniworld Express Pvt. Ltd. Mumbai, India
Logistics and Supply Chain Intern March 2022 - May 2022

- Coordinated inbound and outbound logistics achieving 97% on-time delivery through proactive carrier and supplier scheduling and coordination.
- Negotiated freight contracts improving logistics cost efficiency 12%; optimized warehouse utilization to increase operational throughput by 19%.
- Built vendor scorecards tracking delivery and performance metrics, improving supplier performance visibility 18% to support corrective actions.
- Conducted supply constraint and route analyses across freight lanes, enabling proactive rerouting that reduced average delivery delays by 14%.

PROJECT EXPERIENCE

- **Fastenal, USA: Experiential Learning Project ([Presentation](#))**
Implemented RFID-enabled inventory control and smart vending solutions to automate procurement workflows, enhance supplier visibility, and reduce manual intervention by 87.5%, achieving \$102K (27%) annual cost savings while consolidating 80 suppliers to 10 for improved operational efficiency.
- **Data-Driven Decision-Making: Analysis of Consumers Purchasing Behavior ([Presentation](#))**
Analyzed online purchasing patterns, identifying key demographic and discount-driven behaviors that could increase profit margins by 12%.
- **NikoTech Final Report ([Presentation](#))**
Recommended Just-in-Time (JIT) strategy and supplier contract renegotiations, reducing excess inventory by 15% and improving ROI by 0.7%.
